Product Description:

- This lot contains a 1999 Case 550G Long Track Dozer.
- It has a 3.9 Cummins that is a good starter, however there was a hole in the air intake that allowed dirt in.
- When it was discovered it was found that Case no longer supports this dozer so a home made intake was made, out of pvc. The fix was too late and now engine has significant blow-by.
- The hydrostatic transmission and the hydraulics all work, however there are several leaks.
- The travel brakes work very well.
- See pictures for more details.
- Personal inspections are recommended.
