Product Description:

- This lot contains a Fiat Allis FR12 Front Wheel Loader.
- The wheel loader appeared to be in good usable condition but the brakes were nonfunctional on the day of consignment and will need to be repaired.
 - The problem is believed to be the brake master cylinder but it is not a confirmed diagnosis.
 - It was not operated in 3rd & 4th gear on the day of consignment because of the brake issue.

- It was purchased from the original owner and it appears to be well maintained.
- A couple of the tires are low on tread but hold air without any issues.
- The motor was said to be rebuilt by Seller's of Wichita, KS within the last 5,000hrs but there wasn't any documentation present to confirm what repairs were made.
- The operator door does have some rust on the interior panel and the seat does have wear (see pictures).
- Personal inspections are recommended.
